— WHAT IT IS

Modern SharePoint has no native tabbed-layout web part. Advanced Tabs turns cluttered, endlessly scrolling pages into tidy, application-style tab layouts. It moves your existing web parts into tabs rather than duplicating or iframing them, so their behaviour, lifecycle and permissions stay intact.

— KEY FEATURES

Everything you get

- ✓ **No-code tab grouping**
Group any existing web parts into clearly labelled tab sections from a simple config panel.

- ✓ **Non-destructive**
Moves web parts into tabs without duplicating or iframing them, so nothing breaks.

- ✓ **Clearer structure for Copilot**
Content split into labelled sections is easier for people, and for Copilot and AI agents, to read.

- ✓ **Horizontal or vertical layouts**
Style and orient tabs to fit the page, with accessible labels and keyboard support.

- ✓ **Lighter pages**
Only the active tab renders, cutting clutter and scrolling.

- ✓ **Tenant-resident**
Runs inside your tenant and respects existing SharePoint permissions.

— WHERE TEAMS USE IT

- ✓ Organising many web parts into topic tabs
- ✓ Application-style page layouts
- ✓ Structuring pages for Microsoft Copilot
