— WHAT IT IS

Alerts Fusion is a no-code communications web part that shows any content as a banner, message bar, popup, panel, standard alert or carousel. Pull content from a page URL, HTML, a SharePoint List or rich text; target the right audience; schedule within date ranges; and control how often each person sees it. One tool replaces a pile of ad-hoc ways of getting a message across.

— KEY FEATURES

Everything you get

✓ Multi-format delivery

Banners, message bars, popups, panels, standard alerts and a carousel from one tool.

✓ Four content sources

Page URL, HTML, a SharePoint List, or rich text.

✓ Audience targeting

Reach everyone, or only the users and groups who need the message.

✓ Scheduling and triggers

Fire on click, automatically or after a delay, within a date range.

✓ Frequency control

Auto-open, auto-close and per-person frequency caps reduce alert fatigue.

✓ On-brand and responsive

Styles, animations and placements that stay consistent on every device.
