PEOPLE AND HR · SHAREPOINT WEB PART AND FULL-PAGE APP, TEAMS TAB AND PERSONAL APP, VIVA CONNECTIONS CARDS

DirectoryPoint for SharePoint

Find anyone in your organisation, fast.

Find anyone by name, skill or the task they can help with, in SharePoint, Teams and Viva Connections: forgiving search, rich profiles, an org chart and AI agents beside people, with your directory data kept in your Microsoft 365 tenant.

- 14-day free trial (every feature, from set-up, no key or card)
- UK-built and supported
- Directory data stays in your tenant

WHAT IT IS

DirectoryPoint is an employee directory for SharePoint and Microsoft Teams, delivered as one SharePoint Framework package with four Viva Connections cards. Search forgives typos and knows nicknames, profiles bring Teams chat, call and email together with skills and an org chart, and search by task can list the AI agent and the people who can help. It works with no Microsoft Graph permission to start, and your directory data stays in your Microsoft 365 tenant.

KEY FEATURES

Everything you get

Forgiving search
Search by name, skill, job title, department, office or language, with typos and nicknames handled and results as you type.

Rich profiles
Teams chat, call and email in one tap, skills, an org chart, and how to say a name or work with someone.

Agents beside people
Site owners tag AI agents with tasks, so "book leave" lists the agent and the people who can help.

Discover decks
Private decks to get to know new joiners and colleagues, plus a Who's Who quiz with an opt-in scoreboard.

Favourites by skill
Save a colleague once and they are filed under each of their skills, with private, smart and shared collections.

Data health and change requests
Site owners see missing photos, managers and job titles (the checks need read-only User.Read.All); corrections go to IT and every decision is audited.

WHERE TEAMS USE IT

- A company directory in SharePoint and Teams
- Finding people by skill or language
- Org charts and office pages
- Finding AI agents by task

WHAT CHANGES FOR YOUR TEAM

- People find the right colleague in seconds, even with the name half remembered.
- New joiners get to know the organisation privately, at their own pace.
- Bad directory data gets found and sent to the people who can fix it.
- Every feature in every plan; it starts with no Microsoft Graph permission, and read-only User.Read.All adds the full org chart, filters and data checks.

MADE FOR

HR teams · Intranet owners · IT teams · Everyday employees

WHAT SETS IT APART

- Agents and people in one search by task
- Private and one-way discovery: nobody is ever notified
- Never changes your directory data itself
- External contacts beside staff, with an External badge
