WHAT IT IS

HRPoint is UK HR for Microsoft 365, in SharePoint and Microsoft Teams. It keeps one dated record for each person, works out holiday, sickness and Statutory Sick Pay under UK rules with Northern Ireland's differences, explains every balance and keeps a decision record for every approval. One package gives a SharePoint web part, a full-page app, a Teams personal app and tab, and a Viva Connections card. Your HR data stays in your Microsoft 365 tenant, and it needs no Microsoft Graph permission to start.

KEY FEATURES

Everything you get

One employee record
Worker type, contract terms, working pattern, service, probation and notice, with every change dated so history is never overwritten.

Holiday worked out
Days or hours, pro-rata, irregular hours, each nation's bank holidays and carry-over, with "Explain my balance" on every balance.

Sickness and family leave
Absence notification, fit notes, return to work, day-one Statutory Sick Pay and family leave; a manager sees dates and the category, never a diagnosis.

Right to work
Check records with type, date and checker, copies that cannot be edited, and follow-ups before time-limited permission ends.

Policies people read
A policy library with versions and audiences, mandatory reads with reminders, and an acknowledgement kept for each person and version.

Reports and payroll export
Absence rate, holiday liability, headcount, turnover, starters and leavers, plus payroll export files for your provider.
