HTMLPoint for SharePoint

Build, check and keep live SharePoint HTML pages.

Live dashboards in SharePoint, with no Copilot licence for authors and no Power BI to buy. HTMLPoint builds the page, checks it and keeps it live.

14-day free trial | UK-built and supported | Data stays in your tenant

WHAT IT IS

SharePoint can show HTML pages that read live data, but break one of its rules and the page goes blank with no error. HTMLPoint builds a page from a list, CSV or Excel file with no prompt and no code, creates it as a draft as the signed-in person, then checks it, shows who can read each source and keeps it live. Viewers never need the app or a Copilot licence to read a page.

KEY FEATURES

Everything you get

No-code page builder
Pick a list, CSV or Excel file, choose the columns and a layout, and see the first 50 rows and a page weight meter before you create a draft.

Filters, joins and key figures
Filters, joins between two sources and key figures with red, amber and green, with no code.

Blank Page Doctor
Runs a page in Microsoft's own viewer and shows each blocked item and script error in plain words, each with a fix.

Who can read this?
Shows who can read each source of a page, and where a source is wider or narrower than the page.

Make it live
Finds rows copied into a page, suggests the matching list or file, and swaps the copy for code that reads the live source.

Scan, compare and restore
Lists HTML pages across the sites you can open, compares versions in plain English and restores an earlier one.

Listed on Microsoft Marketplace. Not affiliated with or endorsed by Microsoft.

WHERE TEAMS USE IT

- Live dashboards from SharePoint lists
- KPI pages for teams and departments
- Fixing Copilot-written pages that go blank
- Company page templates re-pointed at each site

WHAT CHANGES FOR YOUR TEAM

- Authors build live dashboards without a Copilot licence.
- A blank page gets an explanation and a fix, not a mystery.
- Data on a page stays live instead of freezing as copied rows.
- People who read the page never need the app.

MADE FOR

Site owners · Intranet teams · Power users · Microsoft 365 administrators

WHAT SETS IT APART

- Opens drafts in Microsoft's real viewer
- Shows how each page was made, with evidence
- Fleet update brings pages to the current template
- Impact map: every page that uses a list or file
