Runs in your tenant

— WHAT IT IS

NavPilot replaces scattered navigation with a single, governed launchpad. Admins pin and categorise company links; each person adds their own private links and hides what they don't need; and a library of reusable AI prompts lives right inside the navigation, ready to copy into the AI tool you use. NavPilot stores the prompts; it doesn't run them. Deploy it as a web part, a full page or a Teams tab.
