- UK-built and supported
- Records stay in your tenant

WHAT IT IS

OnboardPoint runs joiners, movers and leavers in SharePoint and Microsoft Teams. One record per person creates dated tasks for HR, IT, facilities, payroll, managers and buddies, so everyone sees their part and nobody chases by email. One package gives a SharePoint web part, a full-page app, a Teams tab, a Teams personal app and a Viva Connections card. Records stay in SharePoint lists in your own tenant, and it needs no Microsoft Graph permission to start.

KEY FEATURES

Everything you get

HR command centre
Every joiner, mover and leaver on one board by phase, with dated work for every owner and risk flags in words.

Dated journeys from templates
One record per person creates every templated task with an owner and a date, and moving the start date moves every dependent task.

Day-one and last-day gates
The day-one gate shows what is still missing, and a leaver's last-day gate stays shut while any access item is open.

Starter home and the first 90 days
A welcome home in Teams on desktop or phone, check-ins at 30, 60 and 90 days, a buddy and a suggested plan the manager approves.

Evidence packs
Version-bound acknowledgements and a PDF, CSV and SHA-256 manifest per person, a record of who did what and when.

AI agents at work
Register the AI agents you already use, each with a named sponsor; Find an agent suggests them for a step, and only a person completes it.
