# QR Code Drop for SharePoint

## Scan a QR code, send files straight to SharePoint.

Put a QR code on a wall, a letter or a label. Anyone who scans it can answer a few questions and send photos and files, which land in your SharePoint library with the answers in its columns.

14-day free trial | UK-built and supported | Files never stored by us

WHAT IT IS

QR Code Drop turns a SharePoint folder into a drop point. Choose the library, the folder and the questions, print the QR code, and anyone can scan it with a phone, answer the questions and send photos or files with no sign-in and no app to install. The files land in your folder with the answers written into your library columns. Files go straight to your SharePoint and are never stored by APPS 365 LTD.

KEY FEATURES

## Everything you get

### Drop points in about two minutes
Start from site photos, defect reports, event photos, new starter documents or evidence from residents, with a live picture of the upload page.

### Answers fill your columns
Questions write to text, choice, date, number and yes or no columns, and fixed values such as a project are set for people.

### Rules and quarantine
Set file types, sizes and counts, an end date and an upload cap; files that break the rules go to a _Quarantine folder.

### Review before filing
A Review tab with thumbnails and answers, and Approve or Reject, before uploads reach the folder.

### Personal request links
Send links to named people with their details filled in, a due date and reminders, and see who has sent their files.

### QR Studio
Print posters and table tents, and design any QR code: colours, shapes, logos, frames, dynamic codes with scan counts and bulk codes.

Listed on Microsoft Marketplace. Not affiliated with or endorsed by Microsoft.

## WHERE TEAMS USE IT

- Construction and site photos
- Facilities and fault reporting
- New starter and HR documents
- Evidence from tenants and residents

## WHAT CHANGES FOR YOUR TEAM

- Photos and files arrive filed, not dumped in an inbox.
- Senders need no app, no account and no training.
- Your views, alerts and Power Automate flows work from the moment a file lands.
- Staff are told by email or in Teams when files arrive.

## MADE FOR

Site owners · Facilities and operations · Project teams · HR teams

## WHAT SETS IT APART

- No sign-in and no app for the person sending
- Answers become column values on each file
- Dynamic QR codes with scan counts
- Event Pass for a one-off, from £99
